Carola's beauty tip:

Start your holiday with a ST BARTH SOFTNESS treatment. Designed to free your skin from impurities and toxins, you'll feel refreshed and your skin will be much more receptive to the nourishing products used, e.g. as part of the popular ST BARTH SENSATION or ST BARTH HARMONY treatments.

Before your treatment:

We kindly request that you take a shower before your treatment. The high-quality oils from ST BARTH work more effectively on cleansed skin. Only then can they deliver their optimal nourishing effect.

Our tip: after a sauna session followed by sufficient rest, you'll benefit even more intensely from the treatment.

SCHMELZHOF SPA

FINNISH SAUNA

Did you know that the culture of the Finnish sauna has been a UNESCO Intangible Cultural Heritage since 2020? The Finnish sauna is heated to a temperature of between 80°C and 100°C. The recommended time per session is 8 to 15 minutes. Depending on how you're feeling, you can enjoy up to three sessions - alternating with steam bath or sanarium sessions if you wish. The original purpose of the sauna was to deeply cleanse the body. However, saunas also have a positive effect on the vegetative nerve system and general well-being. They also boost the immune system and help prevent colds in particular.

SALINE STEAM BATH

The temperature in the saline steam bath is between 42°C and 45°C. We recommend spending between 10 and 20 minutes in the steam bath. What's special about a steam bath is the humidity, which is almost 100%. The hot steam opens the pores of the skin, stimulates the blood circulation and boosts the metabolism. Moreover, the salt content has a beneficial effect on the respiratory tract. The steam bath also has a particularly relaxant effect on the muscles after sport.

TRANQUILLITY ROOM

Strength lies in serenity - especially after a sauna session. Allow yourself plenty of time to rest and relax in our tranquillity room. Whether you prefer to sit or lie down, it's best to keep your legs elevated. Remember to drink plenty of fluids before and after your rest. A selection of exquisite teas and fruit juices, as well as good Lech spring water, is available for this purpose.

ATRIUM

Take advantage of our small outdoor atrium to cool off after your sauna sessions. You might even be lucky enough to enjoy a little snow.

SANARIUM

The sanarium is heated to a temperature of between 55°C and 70°C. We recommend that you spend between 10 and 20 minutes in the sanarium. For beginners in particular, this is a gentle way to familiarise themselves with the practice of sauna bathing. The somewhat lower temperatures promote a more comfortable sweat. The sanarium is therefore ideal for our guests who struggle with the extreme heat of a Finnish sauna or the high humidity of the saline steam bath.

INFRARED HEAT CABIN

With a temperature of between 38°C and 42°C, you can relax in the infrared cabin for up to 30 minutes. An infrared cabin basically works in a similar way to our sun. In contrast to the sauna, where it's the environment that is heated, the infrared radiation hits the skin directly. The molecules in the skin begin to vibrate causing it to become warmer. Infrared deep heat has a beneficial effect on the body, particularly in the treatment of muscle aches and tension, joint and back pain, concentration problems, arthritis, skin disorders and ear, nose and throat complaints.

CHATTING ROOM

As the name suggests, the chatting room is designed as a space where you can enjoy a conversation in the Schmelzhof Spa. You'll also find some lovely books and a selection of up-to-date newspapers and magazines offering interesting reading while you relax.

GYM

In addition to the sauna, you can also work up a sweat in our gym but here with plenty of exercise instead of high temperatures. Equipped with a cross trainer, ergometer and dumbbells in all sizes, you can pump a few weights here if you still have energy left after a day on the ski slopes.

"When the toils of everyday life simply melt away for a while and you forget the world around you. When you drop off to sleep simply because you feel so safe and relaxed, then we are satisfied. Then we can give you what your body and soul need, namely a TIME-OUT."

DO YOU HAVE ANY QUESTIONS OR REQUESTS?

Dear Guests,

LIGNE ST BARTH

The manufacturer of LIGNE ST BARTH is based on one of the most beautiful islands in the Caribbean: St Barthélemy. This is where the cosmetic products and perfumes are exclusively produced. The family business was established in 1983 but the history of the founding family goes back much further to the year 1648, closely tied to the history of the Caribbean island itself.

The LIGNE ST BARTH combines the traditional knowledge of the Caribbean Arawak Indians with the latest scientific findings and cutting-edge technology using the highest quality standards. Up until a few years ago these unique elixirs from the Caribbean were only known to insiders and are only offered in selected hotels and perfumeries worldwide.
